

SL-3[®]

SENSOR

Multidirectional Vibration Fence Sensor Line

- **Super sensitive**
- **Maintenance free**
- **Self adjusting capability**
- **Automatic contact self-cleaning capability**
- **Can be installed on any type of fence**

The SL-3 Multidirectional Vibration Fence-Mounted Sensor Line is a patented design which supersedes and outperforms all types of fence sensors.

SL-3 Multidirectional vibration fence sensor cable is the most reliable advanced sensor cable. It's unique capability provides super sensitivity and accurate response to vibration caused by any intruder.

The SL-3 sensor is supplied, tested and pre-assembled in 3.0-meter intervals. Installation of the SL-3 Multidirectional sensor cable is very fast and simple; it is ready to mount into any new or existing type of perimeter fence be it wire, chain link, welded mesh, razor tape coil, larded wire, wall or roof.

The field proven sensor is maintenance free due to it's 10 gold plates contact points. The SL-3 assures minimum 10 years of operation thanks for it's self-cleaning capability which also allows a very low rate of false alarm.

SPECIFICATIONS

- Operating temperatures -45°C to +70°C (-50°F to +158°F)
- Operating voltage and currents 12V; 35mA
- Internal contact 10 contact points, improved gold plating with self-cleaning capability.

In keeping with our policy of continuous development we reserve the right to alter these specifications without notice.
